First royal dynasty of the country was founded in 9th century. The kingdom was covered with the vast wilderness and formed a mighty warrior nation. The mighty kingdom took the throne in the 12th century. The country reached peak of prosperity in the 15th century, when its influence reached neighboring kingdoms. In the 1st half of the 20th century, a feudal chaos engulfed the nation. The aristocracy lost control over the nation and the country was abandoned to the law of the strongest and the poor. In the 21st century, with the reign of modernism in the world and back to the roots, the kingdom was renounced its bad reputation and gained new life. Feudal lords began to return home from the cities, rebuilding the glory of the country. During the war for the throne, power was held by the strongest military leader, who was able to temporarily take the throne. Today the world is once again ruled by a new king. However, the kingdom is small and power is shared between the aristocrats. Now you are the new ruler of the land, a forced heir to a true king, but you are aware of the outside world and its complicated politics and power struggle. Gather your friends and servants and prepare for a journey. The land is yours, it's yours to do whatever you want to it! Re: [P-SMLE]Lucid Steam] Playable Dungeon Explorer (A) Euriks5/09/2011 10:04Unregistered I also recommend you try this mod, it is basically just another engine which turns Lucid Steam into a game which allows you to play the dungeons in a dungeon explorer style. Added #dungeon-explorer-tags and #dungeon-explorer-story on some of the Lucid Steam tags. Changed #lucid-steam-to-dungeon-explorer-at-start to automatically play the game as dungeon explorer when starting a new game. You can either press A, B, or X to change back to Lucid Steam. Added a "show story" button. Changed Lucid Steam to Lucid Steam: Unlimited Dungeon Explorer in my tag's name. Changed the description of Lucid Steam to "A dungeon explorer style game where you can play in dungeons, go into town, shop, and battle monsters." I have installed it and tried it to see what it looks like. I am not a modder, nor am I sure what the modder did, but your post leads me to believe it is possible to modify Lucid Steam to add more features. I have been playing through Lucid Steam. I love it, but I have a few requests for future editions. 1. Release a separate series of browser games. Some people like to play and not worry about their progression. If you add new cards to the game, this should be a separate browser game. If Lucid Steam is the only browser game you release, I do not want to have to use Lucid Steam and then go to another site to play my progression. 2. A floor number. This would be nice if it is pre-defined so I can just use it. You can have a minimum floor number. If I set it to "1" and I get to a floor that says "2", I would like to be able to click on "2" and go to the next floor. This would be difficult if there was no floor number listed. 3. Install the user interface in Lucid Steam. It would be nice to see where you have gone before. It would be nice to be able to view the current route and move between floors with no impact on the area you are in. I know I have found

What's new:

MP3's This is the last compilation from the Mayhem above label, and the very last number to feature me on the cover (although I was a part of the label's plans) - It features 17 bands recording one-offs for a DIY record label. After this number I moved on to play with 'Oh Four Legs!' Records, who were also set up by the same guy. I made no attempt to capture all the releases in one volume, and also many of the bands who appeared did not have a physical release. But this is a fun way to both sample a lot of anarcho-folk-eclectic-everything else, and just that, without any need to read each and every one of the releases. As you've probably guessed, over half of these feature solo recordings, so if you'd like to know who each of them is, check the bands pages. - Ed. A surprise entry for the cover track is the cover of The Lavender Hawaii. A Leningrad-based musician who had recorded a lot of punk covers of songs by tracks from between 'She's Got Furs', 'The Clockwork Shift' and 'The Split' compilations, before creating 'Dirty Days' & 'Keep Smiling'. Picking up a borrowed drum kit, Gennady 'Gerry' Naumenko joined forces with Norwegian artists Tania Eriksen, Alice Kaminski and Chris Bull. These recordings eventually found their way onto vinyl (callin-themselves Oben Raisen), and have been re-issued on CD once - lucky for us. I've chosen to give you the 'Dirty Days' version of The Lavender Hawaii, as it most closely reflects the original artists intention behind the project. - Ed. I never did manage to interview 'The Laundromat & The Bathroom' after their 'Greetings From The Industrial Genocide Movement In Svalbard' EP was released (not that it's a bad thing), so I've snuck this one in as a secret - All I know about the band is that they are a Russian trio; not much else; but you'd have to admit, it was a slightly odd look and sound - Did that ever make you blurt the Buttons & Hazard & Julie's Eyes x 3 that out? - Ed. There is another Australian, more in tune with the 27 tempos, which is that of Lavender Hawaii. 'Flirt' was recorded as a favour for his best
