I would like to turn them to fraction numbers, like $3/5+3i/5$ A: There are a few built in classes that can help you with this. Math.Real is probably the easiest: `class Fraction { public readonly double Real; public readonly double Imaginary; public Fraction(double real, double imaginary) { Real = real; Imaginary = imaginary; } }` This can be manipulated like any other class. Since you're interested in the real and imaginary parts you could just do this: `Fraction f = new Fraction(3,3);` The "Imaginary" part of the Fraction object would return $3*i$. For the "Real" part you'd have to call `f.Real` and `f.Imaginary`. Which are fairly straight forward, so not too complex: `double real = f.Real; double imaginary = f.Imaginary;` Of course you could just keep the Fraction object like so: `Fraction f = new Fraction(3,3); f.Real = 3; f.Imaginary = 3;` You could use it like a normal object, but because these properties are public you could also use the property syntax for access to the real and imaginary parts: `f.Real = 3; f.Imaginary = 3;`

1. Learn the Fight System While fighting to protect the world, it is important to control your character's movements. You can freely move the character with the directional keys or with WASD. The difference between regular and normal attacks is that the former execute an attack while you are moving, and you can control the timing, while the latter cannot. Characters with a blue frame next to their name require a special ability for a particular special attack. When you make use of an ability, you can press the Shift key to specify whether it will be first or second use, or the ability will activate immediately when you hit the enemy.

3. Explore and Make Friends The world is a huge place, and it's up to you to discover it! The camera shows you where in the world to go and what to do with the character. While exploring, you'll meet lots of different people from around the world and you'll make friends with them through "social interaction." Social interactions consist of communicating a message with the NPCs, interacting with the NPC's appearance, doing special attacks with other NPCs, and more. As your friends level up, they will get more useful features, which you can equip with special items they have obtained or have searched for.

4. Choose What to Equip You can freely equip your character with items that will help you in combat or that will increase your special ability. Equipping items also allows you to increase your ability stat, allowing you to enhance your tactics as well. When you reach EXP. level 50, you will have more options to use certain items.

5. Power Up EXP. EXP. is the experience points that your character gains during battles and during battles in mini-games. EXP. is gained by defeating enemies, utilizing items that increase your ability, and the success of social interactions. EXP. can also be gained through the use of quest items and certain special items that you get throughout the game. It is important to build up EXP. in advance, because the EXP. gained will be added to your character's EXP. bar. The higher the EXP. bar is, the more EX. will be gained when using special items.

6. Make Friends By making friends with other people, you can exchange your friend's items for your own items. Whether the other people are foes or friends, you can exchange items even if

GAME SYSTEM

Rise of Tarnished adopts the Character Creation System introduced in the original Tarnished, and combines it with

the Fantasy Action System. By combining these two systems, the game uses statistics that are comparable to fantasy sports-themed games, and has a Fantasy Action System where destroying enemies will cause your character to grow in power! Basically, there are four classes that are formed using action points (AP), skills that are acquired by various means, and attributes that determine a character's strength. This time, the processing power is higher, making you able to carry out extremely powerful actions!

By combining the action system, there are skill types that cannot be chosen through the normal process, and battle logic. Because these elements make it possible to enjoy a more immediate and cooperative arcade-type environment in which you are able to fully realize your own strategy, any system that might be unfamiliar to the player can be learned without any special effort on the player's part.

Additionally, because there are many different possible combinations of character specifications, players are able to build a character based on their preferences! Thus, Rise of Tarnished is a new fantasy action RPG that offers

a huge breadth of possibilities!

Furthermore, when monsters are killed, a color is assigned to the surrounding area. This color is then reflected in the Paladin, Thief, and Sorceress' special effects, allowing you to distinguish the enemy's location. It's up to the player how they

D. C. MacAdam David John MacAdam (22 July 1871 - 27 October 1949) was a British writer. Biography The first of the MacAdam brothers, D.J. MacAdam was born on 22 July 1871 at 24 Kilburn Road, Hendon, Middlesex, England. His father was Charles MacAdam (born in Scotland), who emigrated to England with the idea of settling in Australia, and his mother, Jane Webster, an English schoolteacher. The MacAdam family first settled in 1878 in Carrick-on-Suir, Ireland, then moved to Cork in 1880, and finally to Liverpool, England, in 1884, where the father had been appointed lecturer in Chemistry at Liverpool School of Science and Art. The MacAdam children were educated at St Mary's School, Sefton Park, Liverpool, and at Blackheath School, London. MacAdam went up to Trinity College, Oxford, in 1892, and began writing books. In 1899 he entered the diplomatic service as attaché to Austria-Hungary. While in Vienna he was greatly interested in a number of Austrian gypsies, who sold him their performing Tatar children. He made a report which was highly favourable to the Roma, and this in turn drew the attention of the Austrian emperor Franz Josef to their cause. MacAdam's favourable reports aroused the interest of the gypsies themselves, and led to his becoming their patron and protector. MacAdam later (circa 1910) was the police reporter for the Press Association, and a Civil Servant in the Russian, Irish and (apparently) Thai embassies. In 1915 MacAdam reported in The Bookman of the birth of his daughter Dorothy (1915). On retirement, MacAdam's financial situation was dire. Though he and his wife moved to Ambleside, Cumbria, England in 1919, the following year, still unemployed, he suffered what he described as 'a severe emotional collapse'. In his own account of the matter: I was diagnosed, and took chloral [sic] three times a day and three times a week. Then I drank anything that was offered to me—beer, whisky, cocktails, anything. When I say I was under the doctor's care all of 1921 I was not alone in my actions. Thousands of people were similarly affected, as I had been before, during and after the war. No doubt the war brought
