The user interface in AutoCAD version 2.5 History of AutoCAD AutoCAD was first developed by Ken Sanders of Autodesk in 1980. Initially marketed as a drawing

program (R16), the first version of AutoCAD (called AutoCAD R16) was released on May 1, 1982. Version 1.0 was delivered on December 9, 1982. The user interface and other user-oriented features

were added in AutoCAD R17 in 1985. This version was named AutoCAD Release 2 (or AutoCAD R2). AutoCAD releases became numbered with each release consisting of two parts: the first part

containing the "R" followed by the release number (such as R15); and the second part containing the "V" followed by a letter and a release number (such as R15V). With the introduction of

release 4 in 1995, the numbering system changed from the "R" and "V" to "R5V" (the "R" and "V" were dropped from the previous versions). AutoCAD 2006 (R6) was released on November 3, 2006

and became the first version of AutoCAD to be named AutoCAD 2006. AutoCAD 2008 was released on June 19, 2008, and became the first version to be named AutoCAD 2008. The final

version of AutoCAD that was named AutoCAD was AutoCAD R2011, which was released on March 1, 2011. The first release of AutoCAD in 2013 became AutoCAD 2013 on January 22. AutoCAD has been

continuously improved since its release with every new version being released every year. However, the version numbering system remained the same throughout the years: RNNVYYYY,

where N stands for the release number, Y stands for the release letter, and YY stands for the year.

For example, a Microsoft mouse driver is included in AutoCAD, as is an HP Printer driver. CAM Server and WW Server CAM Server and WW Server are sets of special software components that

including features

of a building's structural system, where and how ducts, pipes, wires and fixtures are installed. WW Server includes a feature-rich datum manager and precision leveling tools, which use the

Global Positioning System (GPS) to align plans, sections, and elevations. Current version of the WW Server is available free to current AutoCAD users.

CAM Server The CAM Server is

designed for use with AutoCAD Architecture. It allows for the creation of parametric models, with the ability to convert them to other CAD systems such as AutoCAD, SolidWorks, and

Excel. It can be used to generate reports, manage inventory, track drawings, and create drawings in batch mode. The applications are natively bundled with AutoCAD and include
